Profile Summary

- A detail-oriented professional with **experience of nearly 1 year** in front-end Development.
- Detail-oriented front-end developer with expertise in HTML, CSS, JavaScript, **React**, and **TailwindCSS**.
- Successfully completed projects including **a movie recommendation system** and a blog with **Google authentication**, using **Appwrite** for backend services.
- Skilled in creating **responsive** and user-friendly web interfaces, ensuring high-quality **user experiences**.
- Strong problem-solving abilities demonstrated through effective implementation of complex features and seamless integration of third-party **APIs**.
- In-depth understanding of **modern web development** practices and frameworks, contributing to **efficient** and **scalable** solutions.

Work Experience

Freelancer (Projects) August 2023 – Present

Responsibilities:

- Developed a dynamic movie collections web application (MovieFlex) using React, Tailwind CSS, and Redux, integrating TMDb API for movie data and creating reusable components for maintainability.
- Implemented user authentication, post creation, viewing, updating, and deletion features in the KayhanTechBlog project using ReactJS, TailwindCSS, Appwrite, and Redux, ensuring a seamless and interactive user experience.
- Designed and crafted responsive UI clones for Netflix and Twitter landing pages using HTML and Tailwind CSS, ensuring optimal viewing experiences across various devices.
- Developed the TechForge Dashboard with Material-UI, implementing dark and light modes, react-pro-sidebar, and nivo charts, along with form validation using Yup and Formik.
- Created a Modern Bank App as a Single Page Application (SPA) with React and Tailwind CSS, ensuring a cutting-edge design and responsiveness across various devices.

Achievements:

- Successfully integrated TMDb API into MovieFlex, enhancing the application's functionality and user engagement through dynamic movie data presentation.
- Delivered a comprehensive blog web application (KayhanTechBlog) with robust backend services and state management, contributing to a seamless user experience and interactive features.
- Ensured full responsiveness and aesthetic appeal in Netflix and Twitter UI clones, showcasing proficiency in creating visually appealing and functional designs.
- Developed a highly responsive and feature-rich TechForge Dashboard, optimizing user interface and experience with advanced libraries and tools.
- Created a modern, responsive, and user-friendly bank application (Modern Bank App) that harnesses the power of React's dynamic components and Tailwind CSS's utility-first approach to styling.
